VICTORIA

2 superfici surfaces

La brillantezza e la profondità del colore nella superficie Lux e la grande morbidezza al tatto della finitura Silk si ottengono solo grazie al processo produttivo della bicottura tradizionale, con stesura a Campana di una grande quantità di smalto (2 kg/mq), oggi non più utilizzato nelle produzioni industriali di massa.

The brilliance and depth of colour in the Lux surface and the great smoothness of the Silk finish are obtained only by the traditional double-firing process, using a large amount of glaze (2 kg/sq.m.) with Campana glazing, which is no longer used today in industrial mass production.
