Le Carreau Tendance Ciment

C'est au milieu du XIX^e siècle qu'est né le Carreau de Ciment à Viviers (Ardèche) à proximité d'une des premières cimenteries françaises. Sa production s'est concentrée dans le sud-est de la France où il conquit rapidement, grâce à ses qualités décoratives et à sa robustesse, toute l'Europe. Son déclin s'amorça au milieu du XX^e siècle, supplanté par les céramiques émaillées industrielles. Il connaît aujourd'hui un net regain, que ce soit pour la restauration de vieilles demeures ou pour les constructions contemporaines, séduisant par son authenticité. Aujourd'hui comme hier, chaque Carreau de Ciment est fabriqué à la main et requiert un savoir-faire très spécifique. Un procédé où le tour de main est essentiel et qui donne à chaque carreau la valeur des objets uniques. Le Carreau de Ciment est un produit vivant, qui porte témoignage par sa patine de l'histoire d'un lieu.
